Joe Xavier

Chief Technology Officer

[LinkedIn](#)

Joe Xavier is the Chief Technology Officer at Grammarly. Joe and his global engineering team focus on technology strategy and delivering Grammarly's writing assistance to a growing user base.

Previously, Joe was the VP of Engineering at Mixpanel, where he was responsible for all engineering and machine learning functions. Before joining Mixpanel, he was Director of Engineering at Twitter, where he was responsible for the home timeline and Twitter cards. Joe also led the engineering teams responsible for Recommendations at Amazon and worked on the product side at Microsoft.

Joe is passionate about creating a connected world where effective communication opens doors. He believes Grammarly will help act as an equalizer across geographic, social, and economic divides.

He holds an MS in electrical & computer engineering from the University of Texas at Austin.
